

LoneTrak

What is LoneTrak?

LoneTrak is a multi-featured, tri-band GSM, tracking and personal protection system. In addition to GPS tracking, it offers a simple emergency button feature and silent listening-in capability – all in a very small, light-weight enclosure with an internal GPS antenna allowing it to capture and transmit its position irrespective of the unit's position or alignment.

The LoneTrak device has its own internal (rechargeable) battery and can send reports via both GPRS and SMS on GSM networks worldwide.

What does it allow you to do?

- Keep continuous real-time track of your loved ones or employees
- Provide position reporting at predefined intervals (default set to every minute)
- Send emergency text message along with actual position when the emergency button is pressed, and allows silent listening in at the monitoring centre if desired
- Configure the device from any mobile phone or other SMS device via over the air configuration

Why LoneTrak?

- Real-time tracking capability: its internal GPS antenna allows it to capture and transmit its position irrespective of the unit's position or alignment. Tri-band GSM operation (850/1800/1900) allows it to be used on GSM networks worldwide
- Suitable for providing support services to employees, expeditions or protecting friends and family.
 - in-built memory: ensures constant tracking capability by storing GPS data when a GSM signal is not available and then sending the data when one becomes available
 - the monitoring centre knows where you are and can (optionally) overhear what's happening

- small size – allows device to be concealed in clothing, vehicle, briefcase etc
- Battery will report for up to 22 hrs and has a standby time of over 50 hrs.
